PROJECTS

Hand Gesture Box Creator

August 2026

Frontend Developer Link - https://handboxp.netlify.app/

Individual Project

Technologies Used - JavaScript, MediaPipe Hands, HTML, CSS, Web Camera API

- Developed a browser-based hand gesture recognition application that allows users to draw and move boxes using real-time hand gestures. Implemented pinch-to-draw, two-finger movement, open-hand idle detection, and fist-based box clearing. Camera processing runs entirely in the browser, helping keep video data on the user's device.

GLA Campus Navigator

October 2026 – Present

Frontend Developer (React) Link - https://campus-navigator--liyorajcs25.replit.app/

Team Size: 2

Technologies Used - React, JavaScript, Leaflet, OpenStreetMap, HTML, CSS, GPS, Dijkstra's Algorithm

- A responsive campus navigation web application for GLA University, Mathura, enabling students to select their current location using GPS or manually choose a starting point and destination. Displays walking routes, estimated distance, travel time, and turn-by-turn directions using interactive maps.
